

COVID-19 MEMO

The HVO Team continues to practice the health and safety protocols as recommended by local, state, and federal officials into the working procedures to best combat Covid-19. The team is incorporating these recommendations in all facets of the business from wearing face coverings, to food and beverage preparation as well as cleaning and sanitization practices in all areas. HVO continues to strive to create a safe and healthy environment for staff and guests. When visiting and enjoying time on the farm please note that even with these practices in place there is an inherent risk related to exposure and contracting Covid-19.
